Pneumococcal vaccination decision aid for children aged ≥12 months

- Aboriginal children and children with medical risk conditions (MRC) are recommended to receive 20vPCV in a 4-dose schedule at 2, 4, 6 and 12 months of age^
- Non-Aboriginal children and children without MRCs are recommended to receive 20vPCV in a 3-dose schedule at 2, 4 and 12 months of age^

Catch up vaccination is recommended for children aged ≥12 months in Western Australia. This decision aid aims to assist providers in identifying the appropriate catch-up schedule for children aged ≥12 months .

*The term 'Aboriginal' is inclusive of all Aboriginal and Torres Strait Islander people.
