WA Clinical Coding Authority

Clinical Coding Guidelines: Contracted Care

July 2021

ICD-10-AM/ACHI/ACS Eleventh Edition

Purchasing and System Performance Division

health.wa.gov.au

Purpose

This presentation supplements information in:

- the Clinical Coding Guidelines: Contracted Care
- the Admitted Patient Activity Data Business Rules, July 2021
- the Contracted Care Supplementary Information

This presentation is **only** relevant for those involved in the production of coded data, for episodes of care involving Contracted Care, for contracting/funding/purchaser hospitals (also known as Hospital A).

Contracted Care – Contract Roles & Types

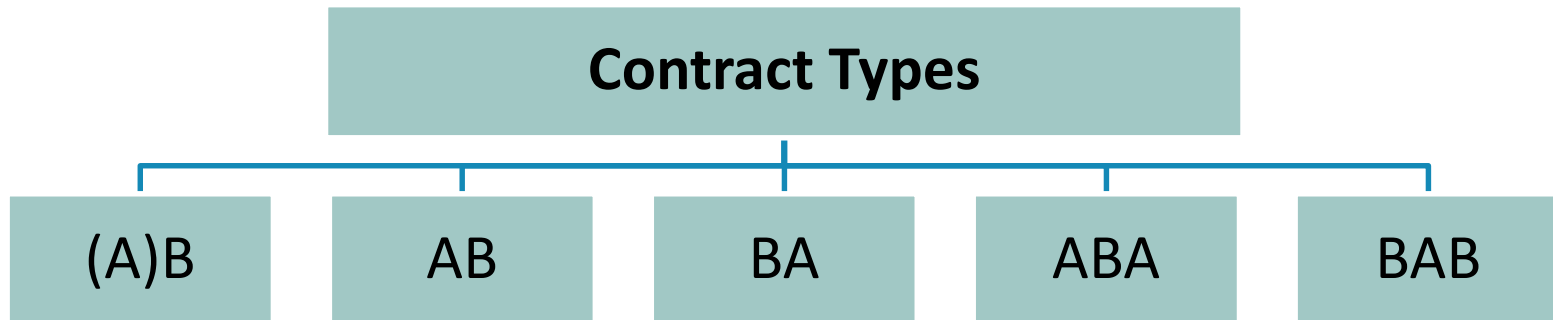

Hospital A

- Is known as the Contracting Hospital, Funding Hospital or Purchaser

Hospital B

- Is known as the Contracted Hospital/ Health Service or Provider

ACS 0029 Coding of contracted procedures

If a hospital treatment is carried out under a contracting arrangement existing between two hospitals, all procedures carried out under the contract are to be recorded and coded in both hospitals.

The hospital not carrying out the procedure should flag the appropriate code.

Contracted Care Flags (CCF)

Null (default value)

- Indicates diagnosis (ICD-10-AM code) was treated at Hospital A only.
- Indicates procedure (ACHI code) was performed at Hospital A only.

B

- Indicates diagnosis (ICD-10-AM code) was treated at Hospital B only.
- Indicates procedure (ACHI code) was performed at Hospital B only.

AB

- Indicates diagnosis (ICD-10-AM code) was treated at Hospital A and B.
- Indicates procedure (ACHI code) was performed at Hospital A and B.

CCFs are **only** assigned to ICD-10-AM/ACHI codes assigned by Hospital A.

For Contract Type (A)B

Hospital A does not report an admitted episode of care

Therefore no codes or CCFs are assigned by Hospital A

For all other Contract Types ...

AB

BA

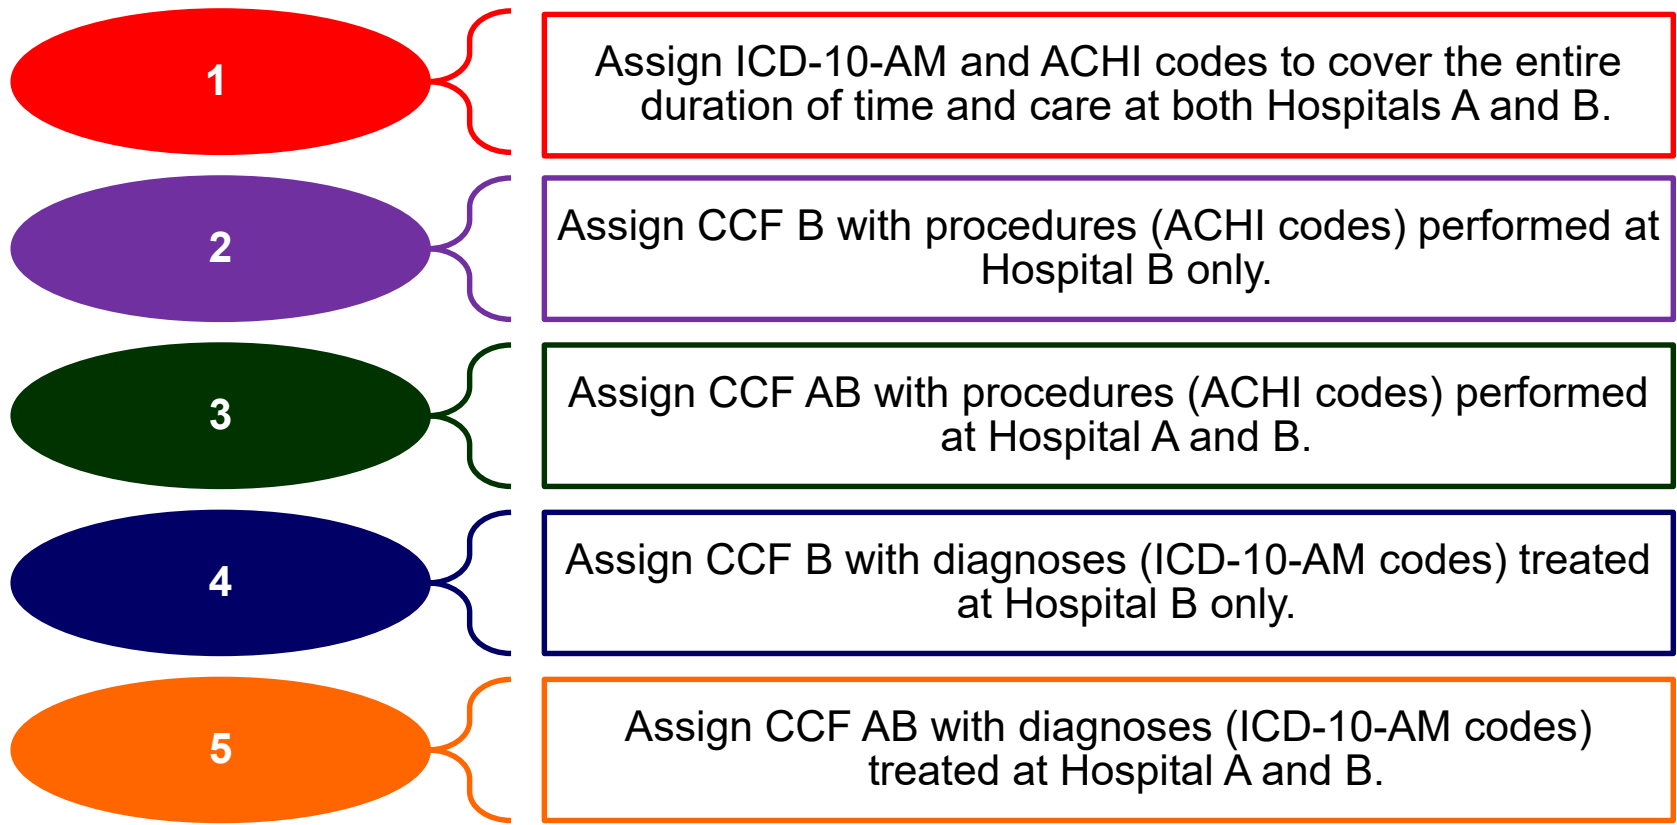

ABA

BAB

... Hospital A must assign the CCF with diagnosis and procedure codes. The following steps will assist with assignment.

Coding and Contracted Care Flag assignment – Steps for Hospital A Coders

Steps for Hospital A Coders when assigning ICD-10-AM/ACHI codes and CCFs to an admitted episode of care involving Contracted Care.

3. Contract Type BA, Scenario 3.2

Background: Hospital A has a contractual agreement with Hospital B to provide hip replacements.

A patient with osteoarthritis is admitted to Hospital B for total hip replacement under general anaesthesia and femoral nerve block.

During surgery, the patient suffers 1.2L haemorrhage. The patient is transfused two units of packed cells. Post-operative bloods indicate anaemia due to acute haemorrhage. The patient returns to Hospital A for ongoing care post-surgery. The patient continues to be symptomatic of the anaemia, so is transfused a further unit of packed cells. The patient is discharged from Hospital A after completing physiotherapy.

Step 1

Assign ICD-10-AM and ACHI codes to cover the entire duration of time and care provided by both Hospitals A and B.

	COF
PD M16.1 Other primary coxarthrosis	2
AD T84.81 Haemorrhage and haematoma following insertion of internal orthopaedic prosthetic devices, implants and grafts	1
EC Y60.0 Unintentional cut, puncture, perforation or haemorrhage during surgical operation	1
POO Y92.23 Place of occurrence, health service area, not specified as this facility	1
ACT U73.8 Other specified activity	1
AD D62 Acute posthaemorrhagic anaemia	1
PP 49318-00 [1489] Total arthroplasty of hip, unilateral	
AP 92514-99 [1910] General anaesthesia, ASA 99	
AP 92512-99 [1909] Regional block, nerve of lower limb, ASA 99	
AP 13706-02 [1893] Administration of packed cells	
AP 95550-03 [1916] Allied health intervention, physiotherapy	

Step 2

Assign CCF B with 49318-00 [1489], 92514-99 [1910] and 92512-99 [1909], as they were performed at Hospital B only.

	COF	CCF
PD M16.1 Other primary coxarthrosis	2	
AD T84.81 Haemorrhage and haematoma following insertion of internal orthopaedic prosthetic devices, implants and grafts	1	
EC Y60.0 Unintentional cut, puncture, perforation or haemorrhage during surgical operation	1	
POO Y92.23 Place of occurrence, health service area, not specified as this facility	1	
ACT U73.8 Other specified activity	1	
AD D62 Acute posthaemorrhagic anaemia	1	
PP 49318-00 [1489] Total arthroplasty of hip, unilateral		B
AP 92514-99 [1910] General anaesthesia, ASA 99		B
AP 92512-99 [1909] Regional block, nerve of lower limb, ASA 99		B
AP 13706-02 [1893] Administration of packed cells		B
AP 95550-03 [1916] Allied health intervention, physiotherapy		

Step 3

Assign CCF AB with 13706-02 [1893] as it is performed at Hospital A and B. As per ACS 0302 Blood transfusions, multiple administrations of packed cells must only be coded once.

	COF	CCF
PD M16.1 Other primary coxarthrosis	2	
AD T84.81 Haemorrhage and haematoma following insertion of internal orthopaedic prosthetic devices, implants and grafts	1	
EC Y60.0 Unintentional cut, puncture, perforation or haemorrhage during surgical operation	1	
POO Y92.23 Place of occurrence, health service area, not specified as this facility	1	
ACT U73.8 Other specified activity	1	
AD D62 Acute posthaemorrhagic anaemia		
PP 49318-00 [1489] Total arthroplasty of hip, unilateral		B
AP 92514-99 [1910] General anaesthesia, ASA 99		B
AP 92512-99 [1909] Regional block, nerve of lower limb, ASA 99		B
AP 13706-02 [1893] Administration of packed cells		AB
AP 95550-03 [1916] Allied health intervention, physiotherapy		

Step 4

Assign CCF B with T84.41, Y60.0, Y92.23 and U73.8 it was treated at Hospital B only.
 Note, Y92.24 assigned by Hospital B becomes Y92.23 assigned by Hospital A.

	COF	CCF
PD M16.1 Other primary coxarthrosis	2	
AD T84.81 Haemorrhage and haematoma following insertion of internal orthopaedic prosthetic devices, implants and grafts	1	B
EC Y60.0 Unintentional cut, puncture, perforation or haemorrhage during surgical operation	1	B
POO Y92.23 Place of occurrence, health service area, not specified as this facility	1	B
ACT U73.8 Other specified activity	1	B
AD D62 Acute posthaemorrhagic anaemia	1	B
PP 49318-00 [1489] Total arthroplasty of hip, unilateral		B
AP 92514-99 [1910] General anaesthesia, ASA 99		B
AP 92512-99 [1909] Regional block, nerve of lower limb, ASA 99		B
AP 13706-02 [1893] Administration of packed cells		AB
AP 95550-03 [1916] Allied health intervention, physiotherapy		

Step 5

Assign CCF AB with D62 as it was treated at Hospital A and B.

	COF	CCF
PD M16.1 Other primary coxarthrosis	2	
AD T84.81 Haemorrhage and haematoma following insertion of internal orthopaedic prosthetic devices, implants and grafts	1	B
EC Y60.0 Unintentional cut, puncture, perforation or haemorrhage during surgical operation	1	B
POO Y92.23 Place of occurrence, health service area, not specified as this facility	1	B
ACT U73.8 Other specified activity	1	B
AD D62 Acute posthaemorrhagic anaemia	1	AB
PP 49318-00 [1489] Total arthroplasty of hip, unilateral		B
AP 92514-99 [1910] General anaesthesia, ASA 99		B
AP 92512-99 [1909] Regional block, nerve of lower limb, ASA 99		B
AP 13706-02 [1893] Administration of packed cells		AB
AP 95550-03 [1916] Allied health intervention, physiotherapy		

Codes, COFs & CCFs assigned for Scenario 3.2

	COF	CCF
PD M16.1 Other primary coxarthrosis	2	null
AD T84.81 Haemorrhage and haematoma following insertion of internal orthopaedic prosthetic devices, implants and grafts	1	B
EC Y60.0 Unintentional cut, puncture, perforation or haemorrhage during surgical operation	1	B
POO Y92.23 Place of occurrence, health service area, not specified as this facility	1	B
ACT U73.8 Other specified activity	1	B
AD D62 Acute posthaemorrhagic anaemia	1	AB
PP 49318-00 [1489] Total arthroplasty of hip, unilateral		B
AP 92514-99 [1910] General anaesthesia, ASA 99		B
AP 92512-99 [1909] Regional block, nerve of lower limb, ASA 99		B
AP 13706-02 [1893] Administration of packed cells		AB
AP 95550-03 [1916] Allied health intervention, physiotherapy		null

2. Contract Type AB, Scenario 2.1

Background: Hospital A has a contractual agreement with Hospital B to provide post-surgical care.

A patient is admitted to Hospital A for subtotal colectomy under general anaesthesia for small bowel obstruction. Once stable post-colectomy, the patient is placed on Contract Leave for ongoing post-surgical Contracted Care at Hospital B. At Hospital B, the patient develops a grade two pressure injury of the sacrum, requiring treatment. The patient is seen three times by the dietician at Hospital B. The patient is discharged from Hospital B.

Step 1

Assign ICD-10-AM and ACHI codes to cover the entire duration of time and care provided by both Hospitals A and B. See also ACS 2103 Admission for post acute care.

	COF
PD K56.6 Other and unspecified intestinal obstruction	2
AD L89.14 Pressure injury, stage II, lower back	1
PP 32005-00 [913] Subtotal colectomy with anastomosis	
AP 92519-99 [1910] General anaesthesia, ASA 99	
AP 95550-00 [1916] Allied health intervention, dietetics	

Step 2

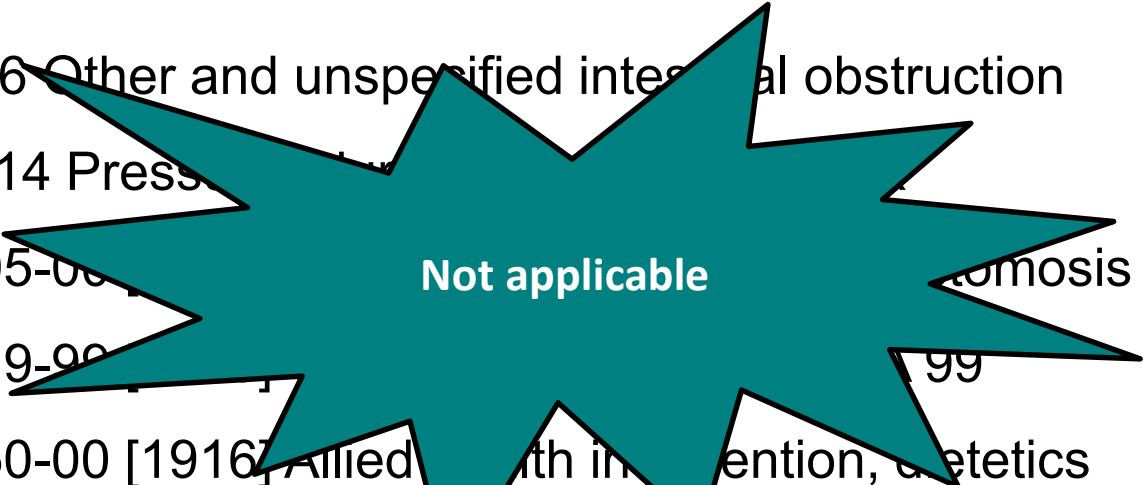

Assign CCF B with 95550-00 [1916] Allied health intervention, dietetics, as it was performed at Hospital B only.

	COF	CCF
PD K56.6 Other and unspecified intestinal obstruction	2	
AD L89.14 Pressure injury, stage II, lower back	1	
PP 32005-00 [913] Subtotal colectomy with anastomosis		
PP 92519-99 [1910] General anaesthesia, ASA 99		
PP 95550-00 [1916] Allied health intervention, dietetics		B

Step 3

Assign CCF AB with procedures (ACHI codes) performed at Hospital A and B. **This step is not applicable to this scenario.**

	COF	CCF
PD K56.6 Other and unspecified intestinal obstruction	2	
AD L89.14 Pressure ulcer	1	
PP 32005-00 [1916] Polypectomy		
AP 92519-99 [1916] Endoscopy, diagnostic		
AP 95550-00 [1916] Allied health intervention, dietetics		B

Step 4

Assign CCF B with L89.14 Pressure injury, stage II, lower back, as it was treated at Hospital B only.

	COF	CCF
PD K56.6 Other and unspecified intestinal obstruction	2	
AD L89.14 Pressure injury, stage II, lower back	1	B
PP 32005-00 [913] Subtotal colectomy with anastomosis		
AP 92519-99 [1910] General anaesthesia, ASA 99		
AP 95550-00 [1916] Allied health intervention, dietetics		B

Step 5

Assign CCF AB with diagnoses (ICD-10-AM codes) treated at Hospital A and B. **This step is not applicable to this scenario.**

	COF	CCF
PD K56.9 Other and unspecified intestinal obstruction	2	
AD L89.14 Pressure ulcer	1	B
PP 32005-00 Stomachostomy		
AP 92540-99 [1915] All health intervention, dietetics		
AP 95550-00 [1916] All health intervention, dietetics		B

Not applicable

Codes, COFs & CCFs assigned for Scenario 2.1

	COF	CCF
PD K56.6 Other and unspecified intestinal obstruction	2	null
AD L89.14 Pressure injury, stage II, lower back	1	B
PP 32005-00 [913] Subtotal colectomy with anastomosis		null
AP 92519-99 [1910] General anaesthesia, ASA 99		null
AP 95550-00 [1916] Allied health intervention, dietetics		B
