# Are you in the loop with your clinical incident management?

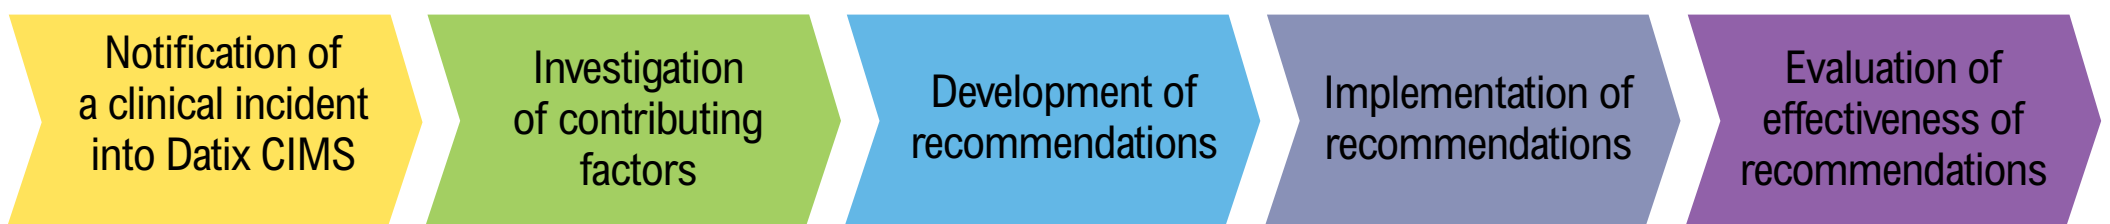

The WA Health **CLOSING the LOOP** program aims to improve **patient safety** by ensuring that all **recommendations** implemented following **investigations** into **clinical incidents** are **evaluated** for **effectiveness** within 6 months to reduce the risk of similar incidents occurring.

| Notification of a clinical incident into Datix CIMS | Investigation of contributing factors | Development of recommendations | Implementation of recommendations | Evaluation of effectiveness of recommendations |
|---|---|---|---|---|

For further information and resources contact your site based safety and quality staff member or access the CIM Policy and Toolkit on the WA Health Safety and Quality website at http://ww2.health.wa.gov.au.
