

# Injury & Trauma - Prevention, Management and Rehabilitation Courses for WA Health Practitioners Audit Report 2012-16

Prepared by the Injury and Trauma Health Network affiliated -  
**Western Australian Trauma Education Committee (WATEC)**

Government of **Western Australia**  
Department of **Health**

## **Background**

The principal goal of the Injury and Trauma Health Network community of practice is to advise on the development of population-centred, sustainable and effective clinical services across all continuums of care.

The responsibilities of the Injury & Trauma Health Network (I&THN) Community of Practice are to absorb those activities formally allocated to the Executive Advisory Group (EAG) outlined within the Terms of Reference (2008). That is to:

Develop and implement a state-wide policy framework for injury prevention and trauma services.

Develop appropriate models of care to strive for equitable access to services.

Provide advice on health priorities, goals and targets that relate to injury prevention and trauma treatment and management in WA.

Provide advice and support in the development of policies that support integration of services through partnerships and collaborations across organisations and government service providers.

Advise on appropriate evidenced-based standards of care including benchmarks, accreditation and credentialing.

Advise on workforce needs and the education and training required by clinicians and other relevant professions and the community.

Advise on the development of injury surveillance and trauma research data systems to inform planning, policy and strategy.

Ensure the production of an annual report that is made available to the public.

In keeping with several of the responsibilities it was decided that a web based directory of WA Trauma Education opportunities would be a useful tool for those interested in or responsible for facilitating professional development.

To this end the community supported by the WA Trauma Education Committee (WATEC), a sub-group of the Injury and Trauma Health Network, conducted a WA Trauma Education Audit which informed this directory, now known as the:

*Injury & Trauma - Prevention, Management and Rehabilitation Courses for WA Health Practitioners Audit Report*

### **Invitation to all interested providers**

The directory as reported is by no means an exhaustive list of all available trauma education. However, it does provide direction to a wide variety of professional development opportunities available to West Australians. If you would like to have your organisations education courses considered for possible inclusion in the audit as part of an annual update simply submit the details, including a contact persons phone number or email address to [healthpolicy@health.wa.gov.au](mailto:healthpolicy@health.wa.gov.au); attention Injury and Trauma Health Network Development Officer, Trauma Education Directory.

Department of Commerce **WorkSafe SmartMove**

Website: <http://www.worksafe.wa.gov.au/smartmove/about.htm>

Target Audience	Content	Contacts
<p>WorkSafe SmartMove is designed for students in year's ten to twelve to make you a little more aware of what can happen in the workplace. It will give you a chance to learn about the potential dangers of the workplace but also your rights and responsibilities.</p>	<p>At WorkSafe, we want young people to know about occupational safety and health (OSH). Lack of experience and skills combined with a desire to work hard and impress people can make you pretty vulnerable and much more likely to be hurt. The reason we've designed WorkSafe SmartMove is to help stop young people being injured and killed every year at work.</p> <p>WorkSafe SmartMove will give you the knowledge you need to stay safe in the workplace.</p> <p>You can work through the activities in WorkSafe SmartMove either on or offline, in class or at home in preparation for your initial work experiences. This work will prepare you for the multiple choice quiz that, if passed, will provide you with your first OSH certificate.</p> <p>Start with the general module and then pick the module for the industry in which you will be working.</p>	<p>On line</p>

Exercise Medicine Australia: **Stay On Your Feet® Tai Chi for Health and Falls Prevention Program**

Website: [www.exercisemedicine.com.au](http://www.exercisemedicine.com.au)

<p><b>Target Audience</b></p> <p>General population over 50 and special population groups with limited balance and mobility</p>	<p><b>Content</b></p> <p>The Tai Chi for Health and Falls Prevention Program has been officially assessed and approved by Australian Physiotherapy Association and Fitness Australia as a national falls prevention accreditation training program for physiotherapists, physical activity leaders, exercise instructors and other health professionals, community health workers and volunteers involved in falls prevention and promotion of active and healthy ageing.</p> <p>Jointly developed Professor Fred Ehrlich, a specialist in geriatrics from the Faculty of Medicine, the University of New South Wales; Alice L. Yuan, a leading international Tai Chi authority with Exercise Medicine Australia; and Dr Henry Zheng, a research fellow with the Faculty of Health, the Queensland University of Technology, the Tai Chi for Health and Falls Prevention Program is an evidence-based, safe and targeted Tai Chi intervention Program designed to strengthen postural control muscles and knee and ankle extensors; overcome lower limb weakness; improve mobility, flexibility, coordination, dynamic balance and postural control strategies; improve proprioception, toe clearance, gait and reaction time; maintain bone density and reduce the risk of bone fracture; build confidence and overcome the fear of falling. The specially designed Tai Chi intervention program also incorporates chair-based movements designed for special population groups with limited balance, mobility or motor impairments.</p> <p>This step-by-step teaching and practice workshop is designed for falls prevention leaders, physiotherapists, exercise instructors and other health professionals, community health workers and volunteers at all levels to learn, practice and be able to deliver the evidence-based and targeted Tai Chi intervention program for falls prevention and health improvement at community and residential settings. No pre Tai Chi knowledge or experience is required. Exercise Medicine Australia also provides tailored training for the national falls prevention program for health departments, local councils and community health centres.</p>	<p><b>Contacts</b></p> <p>Exercise Medicine Australia Address: 240 / 303 Castlereagh St, Sydney 2000 Australia Tel:(02) 92818868 Web: <a href="http://www.exercisemedicine.com.au">www.exercisemedicine.com.au</a> Email: <a href="mailto:service@exercisemedicine.com.au">service@exercisemedicine.com.au</a></p>

### Farmsafe WA Alliance **Child Safety Workshops**

Website: <http://www.farmsafewa.org>

<p><b>Target Audience</b></p> <p>Farmsafe WA Alliance is a not-for-profit community based organisation whose members are farmers, community organisations and individuals who promote awareness and education of farm safety.</p>	<p><b>Content</b></p> <p>Farmsafe WA Alliance is often involved in delivering <a href="#">child safety workshops</a> to parents, community nurses and other interested people. We have recently had the opportunity to provide information through collaborative child safety workshops with Kidsafe WA and Royal Life Saving Society. These workshops have been catered to a variety of audiences and covers child safety on farms, in the home, on the road, in the playground and around water. We have also had the opportunity to present child safety on farms workshops thanks to sponsorship from Partners in Grain and Grain Pool - with some child first aid also being covered by St John Ambulance.</p>	<p><b>Contacts</b></p> <p>On Line</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------

## Farmsafe WA Alliance **Emergency Care in the Bush**

Website: <http://www.farmsafewa.org>

Target Audience	Content	Contacts
<p>Are you prepared for a medical emergency on your farm or station?</p>	<p>We are currently coordinating a project funded by the Department of Local Government and Regional Development to assist farmers and station managers/owners with the information and basic skills for <a href="#">emergency preparedness</a>. Organisations such as FESA and St John Ambulance will be involved to ensure that relevant and practical information will be provided. We are currently seeking expressions of interest to run a workshop in your region.</p> <p>The workshops will cover topics such as:</p> <ul style="list-style-type: none"> <li>▪ Emergency planning and preparedness</li> <li>▪ Who to call in a medical emergency</li> <li>▪ The role of each emergency service</li> <li>▪ Basic skills and what to do in an emergency</li> </ul> <p>The workshop should take approximately 3 hours.</p>	<p>On line</p>

Farmsafe WA Alliance **Farm Safety Course - Managing Farm Safety**

Website: <http://www.farmsafewa.org>

Target Audience	Content	Contacts
<p>Farmers, small business owners.</p>	<p>The <a href="#">Managing Farm Safety</a> one-day workshops are practical, hands on programme for delivery of current best practice management for farm health and safety. The workshops assist farmers from all types of enterprise to develop skills and management tools to meet their legal requirements and productivity goals. Knowing and understanding the Occupational Health and Safety (OH&amp;S) laws will help to avoid unnecessary costs and damage to your business caused by workplace injury and illness. The course includes;</p> <ul style="list-style-type: none"> <li>▪ A combination of theory and practical activities</li> <li>▪ Can be conducted on-farm (discount applies for host farmer)</li> <li>▪ Is suitable for both men and women</li> <li>▪ Provides participants with accredited training farm health and safety management (nationally accredited certificate provided on completion of the course)</li> <li>▪ Participants are provided with a resource for on-farm use</li> </ul> <p>Workshop participants receive a comprehensive resource package and may be eligible for substantial discounts on workers compensation insurance premiums.</p>	<p>On line</p>

## Farmsafe WA Alliance **Mature Farmers Workshop**

Website: <http://www.farmsafewa.org>

Target Audience	Content	Contacts
<p>The target group for the programme is farmers over the age of around 55 years.</p>	<p>The <a href="#">Making Farm Work Easier as We Get Older</a> workshop programme aims to:</p> <ul style="list-style-type: none"> <li>▪ Help older farmers to acknowledge the ageing process and its impact on their work life on their farm or property</li> <li>▪ Help farmers to understand a little more about the common effects of the ageing process on physical and mental processes</li> <li>▪ Help farmers to identify the jobs that are getting harder for them to because of the ageing process</li> <li>▪ Help older farmers to take action to achieve two outcomes:               <ul style="list-style-type: none"> <li>▫ To make the older person fit for the job;</li> <li>▫ To make the job fit for the older person</li> </ul> </li> </ul> <p>The Older Farmers who have devised and steered this programme have been firm that the programme will be effective only if farmers are assisted to think through their recent farm work and life experiences, in the context of helping them achieve their own goals at this stage of their life.</p> <p>The Workshop is NOT about Occupational Health and Safety, although if older farmers take the desired action the ultimate result will be improved safety on their farmers for themselves and others.</p>	<p>On line</p>

<b>Farmsafe WA Alliance Personal Health and Safety</b> Website: <a href="http://www.farmsafewa.org">http://www.farmsafewa.org</a>		
<b>Target Audience</b> People working or living on farms, and for those who manage or work in other agricultural enterprises, such as orchards, market gardens, vineyards and plant nurseries.	<b>Content</b> The Farm Safety series has been produced by Aghealth Australia and cover different aspects of farm safety. Farm employers can use these fact sheets as part of the induction training programme of new employees. Induction should include sufficient information, training and supervision to enable workers to do their work without risk of injury or harm. The following resources provide information on farm health and injury to: <ul style="list-style-type: none"> <li>▪ Assist health workers in their everyday interactions with farmers</li> <li>▪ Support the development of local health programmes inclusive of farmers health and safety needs</li> </ul> Click on the following resource or page links: <a href="#">Farm Health and Safety Toolkit for Rural General Practitioners</a> <a href="#">Farm Health and Injury Chartbook Series</a>	<b>Contacts</b> On line
<b>Kidsafe WA Fact Sheets</b> Website: <a href="http://www.kidsafewa.com.au">http://www.kidsafewa.com.au</a>		
<b>Target Audience</b> Kidsafe is the leading Australian, non-government, not-for-profit charitable organisation dedicated to preventing unintentional childhood injuries.	<b>Content</b> Kidsafe WA has an extensive list of Injury Prevention <a href="#">Fact Sheets</a> online and in print.	<b>Contacts</b> On line

<b>Kidsafe WA Home Safety</b> Website: <a href="http://www.kidsafewa.com.au">http://www.kidsafewa.com.au</a>		
<b>Target Audience</b> Community	<b>Content</b> The Home Safety Section looks at information and programs on how to keep children safe in and around your home. The Home is the most common location for child injuries to occur with approximately 60% of all presentations to Princess Margaret Hospital being for injuries that occur at home. <ul style="list-style-type: none"> <li>▪ <a href="#">Online Safety Demonstration House</a></li> <li>▪ Seasonal Programmes</li> <li>▪ Home Safety Programme</li> </ul>	<b>Contacts</b> To find out more about Kidsafe WA's research and injury surveillance projects and reports visit the website.
<b>Kidsafe WA Research and Injury Surveillance</b> Website: <a href="http://www.kidsafewa.com.au">http://www.kidsafewa.com.au</a>		
<b>Target Audience</b> Community	<b>Content</b> Kidsafe WA has conducted a number of specialised research projects relating to child injury prevention. We also established the first <a href="#">child injury surveillance system</a> at Princess Margaret Hospital in 1986. <ul style="list-style-type: none"> <li>▪ NIPPER- (Neighbourhood Injury Prevention Programme for Education and Research)</li> <li>▪ Drowning Report</li> <li>▪ Child Car Restraints Report</li> <li>▪ PMH Injury Surveillance Reports</li> <li>▪ Quarterly WA Injury Surveillance Bulletins</li> <li>▪ Annual Reports WA Childhood Injury Surveillance Bulletins</li> <li>▪ Aboriginal Child Injury Prevention Project</li> </ul>	<b>Contacts</b> To find out more about Kidsafe WA's research and injury surveillance projects and reports visit the website.

## Kidsafe WA Road Safety

Website: <http://www.kidsafewa.com.au>

Target Audience	Content	Contacts
Community	<p>This section looks at programmes and Information on keeping children safe in the car and on the road. Transport related injuries to children are one of the leading causes of hospital admission. Approximately 200 children present annually at Princess Margaret Hospital as a result of a road traffic injury.</p> <ul style="list-style-type: none"> <li>▪ Kidsafe WA Child Car Restraint Services Fitting, Checking, Hiring and Information/Advice Service. BOOKINGS ARE ESSENTIAL.</li> <li>▪ Driveway Safety               <ul style="list-style-type: none"> <li>▫ <a href="#">Driveway Safety Fact Sheet</a></li> <li>▫ Smart Steps – <a href="#">A Road Safety Booklet for parents and carers of children 0 to 4 years</a></li> </ul> </li> <li>▪ Bicycles and other Devices</li> <li>▪ Helmets (click here)               <ul style="list-style-type: none"> <li>▫ The Bike (click here)</li> <li>▫ Tips for Safe Cycling (click here)</li> <li>▫ Riding with Children as Passengers (click here)</li> <li>▫ Skateboards, Inline Skates, Roller Skates &amp; Micro-scooters (click here)</li> </ul> </li> <li>▪ Hot Cars</li> <li>▪ Pedestrians</li> </ul>	<p>To find out more about Kidsafe WA's road safety services and projects visit the website</p>

<b>Kidsafe WA Safety in Schools Week</b> Website: <a href="http://www.kidsafewa.com.au">http://www.kidsafewa.com.au</a>		
<b>Target Audience</b> The School Safety Section looks at Programmes and Resources for teachers (to assist in the promotion of child safety in your school) and the wider school community (around how to keep children safe while at school but also during travel to and from school).	<b>Content</b> The school is the second most common location for children's injuries after the home. “ <a href="#">Safety in Schools Week</a> ” is an annual school safety awareness event, which aims to provide Western Australian primary schools and the wider community with a week to focus on injury prevention. Safety in Schools Week focuses on injury prevention priority areas that have been highlighted in the National Injury Prevention Plan.	<b>Contacts</b> On line
<b>Rehab Management Ergonomics</b> Website: <a href="http://www.rehabmanagement.com.au">http://www.rehabmanagement.com.au</a>		
<b>Target Audience</b> Workers interested in apply ergonomic principles in the set-up and maintenance of their workstation.	<b>Content</b> Ergonomics training is designed to help workers understand the importance of correct ergonomics in the prevention of injury and enable them to apply ergonomic principles in the set-up and maintenance of their workstation. Training is offered through public courses or tailored training. All ergonomics training is delivered by a qualified occupational therapist or physiotherapist. Public training: This comprehensive training covers the key requirements for this topic. Participants can book and pay for training through a secure online payment facility. The training includes: Anatomy, posture and Biomechanics of injuries, Workstation hazards, Workstation ergonomic assessments and set-up, Work fitness and pause stretch exercise Tailored on-site training: Experienced trainers will work with you to develop training specifically for your workplace.	<b>Contacts</b> Currently conducted in New South Wales.

## Rehab Management **Manual Handling**

Website: <http://www.rehabmanagement.com.au>

<p><b>Target Audience</b></p> <p>Workers interested in apply manual handling principles in their workplace.</p>	<p><b>Content</b></p> <p>Manual handling training provides participants with the skills to safely undertake manual handling tasks and reduce the risk of injury. The programs have theoretical and practical components so that participants gain a full understanding of the subject matter and are able to apply what they have learned in the workplace. Manual handling training is offered through public courses or tailored training. All manual handling training is delivered by a qualified occupational therapist or physiotherapist. All participants receive a certificate on completion of the training.</p> <p>Public training:</p> <p>This comprehensive training covers the key requirements for this topic. Participants can book and pay for training through a secure online payment facility. Public training includes: Health and safety legislative requirements, Anatomy and Biomechanics of injuries, Risk assessment and management, Safe manual handling techniques, Work fitness and pause stretch exercises</p> <p>Tailored on-site training:</p> <p>Experienced trainers will work with you to develop a program specifically for your workplace. This can include undertaking a workplace assessment to identify areas of risk and designing training to use practical examples and case studies relevant to the participants' work and work environment.</p>	<p><b>Contacts</b></p> <p>Currently conducted in New South Wales.</p>

School Drug Education and Road Aware **Smart Steps: Engaging Parents and Children in Road Safety**

Website: <http://www.sdera.wa.edu.au>

Target Audience	Content	Contacts
<p>Staff who work with Kindergarten to Year 3 students.</p>	<p>Smart Steps aims to promote parent and community involvement in road safety education and improve road safety outcomes for children aged 0 – 4 years.</p> <p>Smart Steps is a parent and carer education program regarding the use of:</p> <ul style="list-style-type: none"> <li>▪ child car restraints and general passenger safety</li> <li>▪ safe pedestrian practices</li> <li>▪ safe places to play</li> </ul> <p><i>Smart Steps Workshop</i> is a great precursor to the <i>Challenges and Choices</i> early childhood workshop. Participants will look at issues around passenger, pedestrian and play safety for young children; gain a deeper understanding of what influences positive road safety attitudes and behaviour change; look at ways to implement road safety information sessions for parents; and unpack the <i>Smart Steps</i> resource.</p>	<p>On line</p>

School Drug Education and Road Aware <b>Challenges and Choices - Resilience, Drug and Road Safety Education</b>		
Website: <a href="http://www.sdera.wa.edu.au">http://www.sdera.wa.edu.au</a>		
<b>Target Audience</b> School based staff working with Kindergarten to Year 7 students.	<b>Content</b> Road safety education for Kindergarten to Year 10 students is the focus of Challenges and Choices resources and professional learning workshops. Road safety issues such as passenger, pedestrian and riding safety are covered through a range of interactive activities and with a focus on developing self-management and interpersonal skills. Decision-making, problem-predicting and problem-solving will give young people the skills to make safer decisions in and around traffic.  This workshop will provide participants with an understanding of effective resilience, drug and road safety education, three contexts identified in the K-10 Health and Physical Education Syllabus. A range of activities and teaching and learning strategies from the <i>Challenges and Choices</i> resources, which can easily be transferred into the classroom, will be modelled throughout the workshop.	<b>Contacts</b> On line
School Drug Education and Road Aware <b>Keys for Life Pre-Driver Workshop</b>		
Website: <a href="http://www.sdera.wa.edu.au">http://www.sdera.wa.edu.au</a>		
<b>Target Audience</b> School based staff working with Year 10-12 students.	<b>Content</b> This workshop focuses on young driver issues; the WA Licensing System and developing students' self-management skills in traffic-related situations. It unpacks the <i>Keys for Life</i> resource and gives participants a range of activities and strategies; an understanding of how to administer the Learner's Permit Test at school; and information on accessing a <i>Keys for Life</i> one-hour workshop for parents and young people, offered by the RAC.  <i>Keys for Life</i> can also be offered as a Curriculum Council endorsed program that counts as one point towards the WACE.	<b>Contacts</b> On line

<b>School Drug Education and Road Aware Keys for Life Parent Workshop</b> Website: <a href="http://www.sdera.wa.edu.au">http://www.sdera.wa.edu.au</a>		
<b>Target Audience</b> This is a free, school community-based initiative for young people and their parents/carers that promotes the importance of supervised driving practice for learner drivers.	<b>Content</b> The 1 hour interactive session provides parents/carers and the learner driver with the importance of getting as much supervised driving practice as possible ways to communicate to take the stress out of driving practice Students who help to organise and run a <i>Keys for Life</i> parent workshop can accumulate hours towards their compulsory 20 hours of community service. Schools can contact the <a href="#">RAC</a> in the metropolitan area or RoadWise and SDERA Regional Project Officers to facilitate the session.	<b>Contacts</b> On line
<b>School Drug Education and Road Aware Getting it Together: A Whole-School Approach to Road Safety Education</b> Website: <a href="http://www.sdera.wa.edu.au">http://www.sdera.wa.edu.au</a>		
<b>Target Audience</b> For Primary and Secondary School Staff.	<b>Content</b> This workshop unpacks the Getting it Together resource which outlines an effective model for school road safety education that can be used to assess, plan and implement strategies. It provides participants with an understanding of best practice principles in road safety education; the issues for children and young people; road safety curriculum resources already in schools; and links schools to support agencies.	<b>Contacts</b> On line
<b>School Drug Education and Road Aware Getting it Together: A Whole-School Approach to Drug Education</b> Website: <a href="http://www.sdera.wa.edu.au">http://www.sdera.wa.edu.au</a>		
<b>Target Audience</b> For Primary and Secondary School Staff.	<b>Content</b> This workshop unpacks the new resource <i>Getting it Together</i> which outlines an effective model for best practice in school drug education; considers how to develop School Drug Education Guidelines and procedures for managing drug use incidents and providing support interventions to students. Participants will gain an understanding of how to assess, plan and implement effective drug education and to link with community based services that provide support to schools' drug education initiatives.	<b>Contacts</b> On line

School Drug Education and Road Aware **Health Education Made Easy**

Website: <http://www.sdera.wa.edu.au>

<p><b>Target Audience</b></p> <p>School based staff working with Year 8 to 10 students.</p>	<p><b>Content</b></p> <p>This workshop looks at drug and road safety issues for young people. It unpacks the <i>Challenges and Choices: Early Adolescence Resource for Resilience, Drug and Road Safety Education</i> which has specific content linked to the K-10 Health and Physical Education Syllabus and the Curriculum Framework Health and Physical Education Learning Area Outcomes. Participants will walk away with a range of activities and teaching strategies that can be transferred into their classroom and health programs.</p>	<p><b>Contacts</b></p> <p>On line</p>

Emergency Life Support Committee – NSW **Emergency Life Support**

Website: <http://www.elscourse.com.au>

Target Audience	Content	Contacts
<p>The target audience for the ELS course is any doctor who manages medical emergencies without the benefit of immediate on site specialist backup. This will include: Rural General Practitioners, Hospital Salaried Medical Officers Registrars</p>	<p>A 2-day course teaching a systematic approach to the emergency management of any seriously ill patient. The course consists of an intensive program of lectures, skill stations, and interactive group discussions.</p> <p>Each course is limited to 21 participants.</p> <p>There are 8 skill stations with 3 participants per instructor.</p>	<p>On line</p>

### Fremantle Hospital **Advanced Life Support**

Website: <http://www.fhhs.health.wa.gov.au>

Target Audience	Content	Contacts
Resuscitation and Medical Emergency Team members, Medical and Nursing staff working in critical care areas, Operating Room, Anaesthesia and Recovery, or remote and rural areas, Paramedics.	This two day <a href="#">Australian Resuscitation Council</a> (ARC) and Resuscitation Council (UK) co-badged course aims to teach senior members of the multi-disciplinary team the theory and practical skills to effectively manage cardio-respiratory arrest, peri-arrest situations and special circumstances.	On line

### Fremantle Hospital **Paediatric Life Support**

Website: <http://www.fhhs.health.wa.gov.au>

Target Audience	Content	Contacts
Nursing and Medical practitioners who wish to update their knowledge and skills in the management of the severely ill or injured child.	<p>This one day course focuses on a systematic approach for the first ten minutes of management of the seriously ill/injured child as per <a href="#">Advanced Paediatric Life Support</a> Australia and New Zealand. Pre-course reading and multiple choice question paper are distributed prior to the course. The course includes:</p> <ul style="list-style-type: none"> <li>■ Recognition of the seriously ill child</li> <li>■ Paediatric basic life support</li> <li>■ Airway management</li> <li>■ Intraosseous access</li> <li>■ Rhythm recognition and defibrillation</li> <li>■ Initial assessment &amp; management of the seriously injured child</li> <li>■ Simulated resuscitation scenarios</li> </ul>	On line

**MOET Australia & New Zealand – Managing Obstetric Emergencies and Trauma (MOET)**

Website: <http://www.moetaustralia.com.au/>

Target Audience	Content	Contacts
<p>All candidates on the MOET course must be from a medical background, either in obstetrics, GP obstetrics, anaesthetics, GP anaesthetics, emergency medicine or intensive care. The course is aimed at a specialist level, but senior registrars in obstetrics and gynaecology or anaesthetics are eligible, provided they are year 5 or above and have passed the RANZCOG or ANZCA membership examination. General practitioners need to have RACGP or equivalent and be regularly involved in the provision GP obstetrics and/or GP anaesthetic services.</p>	<p>The MOET course runs for two and a half days and covers trauma (first day), obstetrics (second day) and examinations (final half-day). The format for teaching consists of a comprehensive package of didactic teaching, scenarios, skills drills, small group workshops, demonstrations and moulages to teach and reinforce knowledge and skills acquired by the candidates. There is continuous assessment of skills during the course, as well as an MCQ and OSCE exam on the final day.</p> <p>The MOET course builds on core skills and knowledge expected of a senior clinician. There is currently no comparable course in Australia. It is more advanced than the ALSO course, however the two courses may complement. The PROMPT course has some features that may also complement MOET in terms communication, teamwork and emergency management systems within individual maternity units, but does not attain the peak levels of achievement for individuals.</p> <p>MOET commenced in Australia in 2009, starting with two courses and one instructor course in Sydney in November. We plan to run four to five courses per year in Australia and New Zealand, as well as at least one instructor course. Where possible we try to link courses with national and international scientific meetings and symposia.</p>	<p>On line:  <a href="http://www.moetaustralia.com.au/moet-courses-2012-online-application-1">http://www.moetaustralia.com.au/moet-courses-2012-online-application-1</a></p>

Queensland Government **Pre Hospital Trauma Life Support (PHTLS)**

Website: <http://www.sdc.qld.edu.au>

Target Audience	Content	Contacts
<p>Health care providers should have clinical experience in either emergency or critical care in the immediate hospital setting or pre hospital.</p> <p>All participants should have general first aid knowledge and an understanding of emergency care terminology and familiarity with standard emergency equipment.</p>	<p>The PHTLS course is a unique two-day multidisciplinary continuing education program designed to increase knowledge and skills in delivering critical care in front line pre-hospital trauma care and the handling of trauma patients.</p> <p>PHTLS teaches students to deal with trauma where there may be some delay in transferring the patient to a healthcare facility.</p> <p>The PHTLS Course provides the participant with the fundamental awareness that while definitive care cannot be provided for the critically injured trauma patient in the field, the continuum of care begins at the scene with competent pre-hospital trauma management.</p> <p>Participants are required to participate in the full 2 days / 17 hours to achieve a Certificate of Attendance.</p> <p>To successfully complete the course and receive the NAEMT Advanced Provider Accreditation, participants must complete the written multiple-choice examination with a mark of 76% or greater and successfully complete four skill stations.</p>	<p>On line</p>

Royal Australasian College of Surgeons **Early Management of Severe Trauma Course (EMST) adapted from the Advanced Trauma Life Support (ATLS) Course**

Website: <http://www.surgeons.org>

<p><b>Target Audience</b></p> <p>It is designed for all doctors who are involved in the early treatment of serious injuries in urban or rural areas, whether or not sophisticated emergency facilities are available: surgeons, emergency physicians, rural GPs, anaesthetists, intensivists, medical officers in the Armed Forces, trainees in the above specialties.</p>	<p><b>Content</b></p> <p>A two and half day intensive course in the management of injury victims in the first 1–2 hours following injury.</p> <p>Adapted from the Advanced Trauma Life Support (ATLS®) course of the American College of Surgeons in 1988.</p> <p>Emphasis on life saving skills and systematic clinical approach.</p>	<p><b>Contacts</b></p> <p>On line</p>

Royal Perth Hospital (RPH) **The Essentials of Burn Care Module 1 and 2**

Website: <http://www.rph.wa.gov.au>

**Target Audience**

All nurses, health team providers and paramedic team members.

**Content**

This is a 2 day course which will provide the [initial burn care](#), burn surgical management and patient care.

Module 1:

Principles of Burn First Aid

Patho Physiology of burns

Immediate interventions post burn injuries

Interventions prior to transfer

Treatment of major burns in the first 24 hours

Module 2:

Major burns, chemical and electrical burns treatment

Burn Surgical options

New technology and innovations in burn surgery

Rehabilitation for burn patients

Psychological / social issues and the burns patient

Patient perspectives

The WoundsWest Module is also recommended via the link below:

<http://www.health.wa.gov.au/woundswest/education/index.cfm>

Click on the module  icon and it will take you to the Wounds west module home page for registration.

**Contacts**

This course is available yearly and is usually held around June/July.

Please contact the RPH Education Centre directly on 9224 2498 or on 9224 2244 (via hospital switchboard)

### Royal Perth Hospital (RPH) **The Master of Clinical Nursing ( Emergency )**

Website: <http://www.rph.wa.gov.au>

<p><b>Target Audience</b> Registered Nurses</p>	<p><b>Content</b> A collaborative program between <a href="#">Royal Perth Hospital</a> and the School of Nursing, Midwifery and Postgraduate Medicine at <a href="#">Curtin University of Technology</a>.  The course is designed to provide the foundations of nursing science, together with the clinical knowledge and skills required to develop specialist practice. A significant component of the course is conducted in a health care institution. It focuses on the development of clinical leadership, promotion and integration of evidence-based nursing practice to foster the development of graduates consistent with the profile of the nurse specialist, offering the advanced level nurse further clinical skills and an opportunity to extend career options. It also provides the foundation for professional doctoral studies.  Students may exit the program at the certificate, and diploma level.</p>	<p><b>Contacts</b> Please email '<a href="mailto:RPH.ResusTraining@health.wa.gov.au">RPH.ResusTraining@health.wa.gov.au</a>' or contact the RPH Education Centre directly on 9224 2498 or on 9224 2244 (via hospital switchboard)</p>

Rehab Management <b>Functional Education</b>		
Website: <a href="http://www.rehabmanagement.com.au">http://www.rehabmanagement.com.au</a>		
<b>Target Audience</b> Injured workers.	<b>Content</b> Functional education is an evidenced-based intervention utilising every day activities of daily living (ADL), work activities and exercise to help a worker manage their injury, increase their capacity and work comfortably and safely. An occupational therapist will set goals based on every day activities to promote recovery. Progress is monitored against the established goals. Benefits: Increases functional performance which transfers to the work environment Reduces the period of incapacity through proficient and active involvement in home activities Reduces likelihood of exacerbating pain through learned self-pacing techniques. Empowers an injured worker to control and manage their injury which can motivate them to return to work. Expected Outcome Functional education achieves an increase in activity and assists in a return to work by improving an injured worker's functional performance and promoting the workers coping skills and strategies for daily activities.	<b>Contacts</b> Currently conducted in New South Wales.

Rehab Management **Integrated Program**

Website: <http://www.rehabmanagement.com.au>

**Target Audience**

Workers who meet the following criteria would benefit from the program:

- claims over 52 weeks from date of injury
- diagnosed “soft tissue” injury
- certified unfit for suitable duties and have exceeded their expected recovery time
- cases where there are no red flag indicators eg not awaiting surgery, no healing fracture.

**Content**

The integrated program is a holistic, approach to rehabilitation for long term claims. The program is delivered by a multidisciplinary team of qualified professionals. It brings key rehabilitation services together in a single, streamlined program, with one point of contact. Through this concentrated, but carefully tailored and managed approach, we increase the injured worker’s capacity, help them to return to work and, in doing so, reduce your ongoing claims liability.

Our fee structure is designed so that we share the risk with you. A basic service fee initiates the program with an incentive fee only payable when we get results.

Program outline

The program focuses on three key areas:

- pain management
- functional upgrading
- job seeking programs

Services are designed to work closely together to gradually build the worker’s capacity and maximise the outcome. Programs are offered over 8 or 12 weeks, as individual programs or in a group environment, depending on the workers assessed needs.

Expected outcomes

The integrated program achieves tangible results for long term claims: increased capacity; upgraded certificates; a full or partial return to work.

Rehab Management **Initial Assessment**

Website: <http://www.rehabmanagement.com.au>

<p><b>Target Audience</b></p> <p>Workplace and Human Resource Managers and injured staff.</p>	<p><b>Content</b></p> <p>An initial assessment, or rehabilitation assessment, examines the needs of an injured or ill worker and the workplace requirements to develop a rehabilitation plan. The assessment includes the services and treatments recommended to assist the worker to return to pre-injury duties.</p> <p>A rehabilitation consultant will conduct an in-depth interview with the worker to obtain information relating to the injury. Further detail is gathered from doctors, health professionals and the employer, to contribute to the assessment of the worker's needs.</p> <p>An initial assessment can be used as a 'one-off' service by employers to determine the extent of a worker's injuries. This gives them information so that they can take a proactive approach to the return to work (RTW) process, either managing it internally or through a rehabilitation provider.</p> <p><b>Expected Outcome</b></p> <p>The aim of the initial assessment is to gather information to determine the severity of the injury and limitations due to the injury, in order to develop a RTW goal that is agreed by all stakeholders.</p>	<p><b>Contacts</b></p> <p>Currently conducted in New South Wales.</p>
-----------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------

**Rehab Management Job Seeking Programme**

Website: <http://www.rehabmanagement.com.au>

**Target Audience**

Job seekers who have been injured and want to return to work.

**Content**

Our innovative Job Seeking Program is designed to return injured workers to durable, new employment when they cannot return to their pre-injury job. This outcome focused program is offered at our local office and has three distinct phases: Job Seeking Assessment; Job Seeking Training; and Active Job Search. While generally offered one-on-one, the training and job search phases can be run for small groups.

Compliance is monitored closely throughout the program. We liaise fortnightly with the agent/insurer, and other stakeholders as appropriate, reporting on compliance and the worker's progression through the program.

**Phase 1: Job Seeking Assessment**

A focused assessment identifies the individual's transferrable skills, viable vocational goals, interests and any barriers to employment. A concise report outlines the assessment findings and recommends a tailored program for each worker.

**Phase 2: Job Seeking Training**

A tailored program of up to eight training modules held over 4 weeks, develops the workers skills so that they become confident, independent job seekers. We provide a concise report on completion of the training outlining the individuals training outcomes.

**Phase 3: Active Job Search**

Support, supervision and monitoring is provided over six sessions, twice weekly, as the individual utilises their newly learned skills and actively looks for employment. A progress report is provided on completion which may include recommendation for further sessions.

## Rehab Management **Labour Market Analysis [LMA]**

Website: <http://www.rehabmanagement.com.au>

### Target Audience

Workplace and Human  
Resource Managers

### Content

A labour market analysis can provide essential information for people looking to change employment or injured workers who cannot return injury to their pre-injury work.

A labour market analysis offers evidence in support of an application for an earning capacity assessment for an injured worker. A sound understanding of the local labour market is also effective for ensuring that a reasonable, achievable job goal is set.

### Expected outcome

A labour market analysis ensures that a recommended vocational goal is actually achievable within the local labour market

Rehab Management **One - off Review**

Website: <http://www.rehabmanagement.com.au>

<p><b>Target Audience</b></p> <p>Workplace and Human Resource Managers and injured staff.</p>	<p><b>Content</b></p> <p>Rehab Management can provide a one-off single service to complement existing rehabilitation/injury management coordination being undertaken by a claims agent, insurer or employer.</p> <p>One-off reviews are conducted by an experienced allied health or rehabilitation professional with skills relevant to the type of service required.</p> <p>Reviews may include:</p> <ul style="list-style-type: none"> <li>■ a worksite review and evaluation of current suitable duties, with recommendations for equipment provision, upgrading of work capacity, manual handling or functional education</li> <li>■ liaising with the treating doctor following a worksite review</li> <li>■ review with the return to work coordinator, claims agent or insurer to provide strategies to progress a case</li> </ul> <p>Expected outcome</p> <p>One-off reviews are a cost-effective and efficient service to support case management. One-off reviews are of particular benefit when conducted at strategic points during the life of a claim.</p>	<p><b>Contacts</b></p> <p>Currently conducted in New South Wales.</p>
-----------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------

## Rehab Management **RM RapidStart**

Website: <http://www.rehabmanagement.com.au>

### Target Audience

Workplace and Human Resource Managers and injured staff.

### Content

Early intervention is the key to rapid recovery leading to a durable, early return to work (RTW). An early, sustained RTW minimises claims costs and disruptions to productivity.

Our *RM RapidStart* interventions are one-off, early intervention services for physical or psychological claims. For workers compensation cases services are instigated within 24 hours. Timeframes, and other elements of the service, are tailored for each insurance framework, including life insurance and for individual businesses. *RM RapidStart* is designed to provide you with the information you need to take a proactive approach and make prompt, informed decisions to maintain a worker in the workplace or assist them to return to work following an injury, illness or disability.

#### Initial/Workplace Assessment

Assesses availability of suitable duties inc: review of pre-injury duties and physical requirements and identification of alternate suitable duties.

Initial contact: 1 day

Assessment, report: 5 days

#### Initial/Workplace Assessment and Suitable Duties (SD) Plan

Assessment plus development of a graduated suitable duties plan documenting the short term suitable work duties and signed by treating doctor, worker and employer.

Initial contact: 1 day

Assessment, report, SD plan: 5 days

Plan sign-off: 10 days

All *RM RapidStart* services also include use of OMPQ – Orebro Musculoskeletal Pain Questionnaire - to identify barriers to RTW and liaison with all key stakeholders.

Services can be supported by a one-off case conference with the nominated treating doctor. This collaborative approach ensures that suitable duties are within the certified medical restrictions and the Suitable Duties Plan is medically endorsed.

## Rehab Management **Workplace Assessment**

Website: <http://www.rehabmanagement.com.au>

### Target Audience

Workplace and Human Resource Managers

### Content

A workplace assessment is a specialised on-site assessment of a worker's duties and/or potential suitable duties.

A thorough workplace assessment will assist to resolve problems identified to be causing or aggravating workplace injuries and will also identify preventative actions, such as a more formal occupational health and safety risk assessment, ergonomic assessment or training.

A workplace assessment is also a useful tool for upgrading medical certificates or sourcing suitable duties. It can be used to compliment occupational rehabilitation, or in itself may substitute for a treatment program.

Employers can also use the assessment to:

- ensure the workplace is equipped for new workers, people with disabilities or those with specific needs
- design an agreeable return to work plan that matches the employees functional capacity.

### Expected outcome

The aim of a workplace assessment is to identify preventative options, establish suitable duties and provide a safe working environment.
